

PROTECTOR GUN BAG S

APPLICATION

Fits one long weapon and accessories, allows discreet transport and protection against mechanical damage, dirt and atmospheric conditions. It can contain submachine guns FN P90, H&K UMP, SigSauer MPX, UZI or CZ Scorpion with folded stock.

PROPERTIES

Made of cordura and filled with 40 mm thick foam, so it is lightweight and resistant to abrasion. The main compartment contains the PALS system webbing that allow you to adjust the position of the weapon inside, and attach pockets and accessories in the remaining free space. Main compartment and all pockets are closed with two-way zippers from a reputable YKK company. Each zipper is protected against environmental conditions by a special collar.

On the front wall there are 3 pockets: large, with dimensions 14" x 10" x 2.5", and smaller, with dimensions 8" x 10" x 2.5". The interiors are covered with velcro-like material, which allows for attaching accessories and organizing contents. Between the pockets and the main part of the case is a velcro-lockable interior space, suitable for carrying flat objects (like targets) or discreet storage of keys and documents.

Larger pocket is fitted with two smaller, lockable with shared zipper. The use of the mesh allows for easy identification of their contents. The small pocket is separated by a sturdy mesh compartment.

25 mm straps were sewn on the back. They allow the assembly of multifunctional, fully adjustable carrying straps. Because webbing is compatible with the PALS system, additional accessories and pockets can be fitted to them.

The case is equipped with a comfortable shoulder strap. You can attach it to the PALS webbing on the back of the bag and a specially designed loop above the pocket.

Dimensions: total length 23.5"; inside length 21"; height 13.5"; width 4.5" empty/8" with content.
